

ECLS Tubing Packs

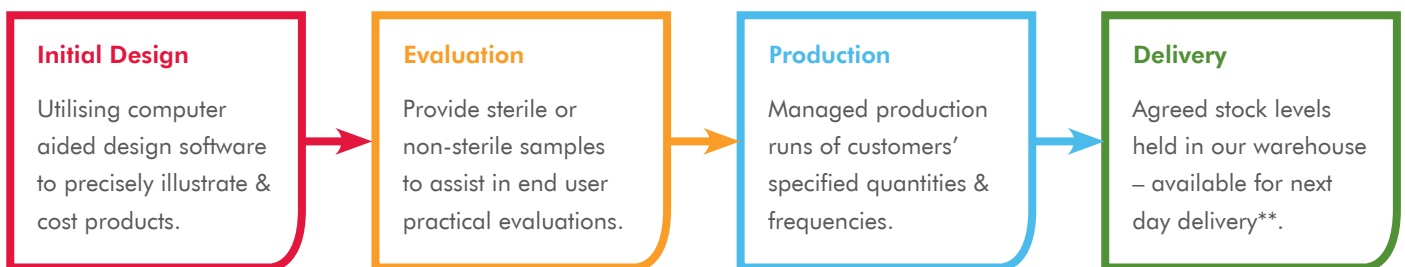

Chalice has over a decade and a half of experience in producing premium, bespoke tubing packs for ECMO and extra-corporeal bypass.

Using state of the art equipment in 4 of our 8 class-7 cleanroom production rooms; we only use components and tubing of the highest quality, which is thoroughly checked and supplied by regulated providers from around the world.

Our range of complete ECMO sets can be supplied in a convenient and singly boxed system that contains; one coated Paragon® PMP Oxygenator pre-connected inside a premium ECMO tubing pack and, a CentriMag™ or PediVAS™ pump*.

Our complete and professional in-house service covers every stage of the tubing pack development and supply:

Catering for the widest variety of bespoke tubing packs regardless of size or complexity, we acknowledge and adhere to the stringent guidelines set out by the industry's regulatory bodies, while simultaneously manufacturing to customers' exact specifications and requirements.

*CentriMag™ and PediVAS™ are registered trademarks of Abbott / St Jude Medical. Chalice Medical Ltd. are the authorised UK distributor for the CentriMag™ and PediVAS™ on behalf of Abbott / St Jude Medical. CentriMag™ and PediVAS™ pumps are packaged separately to an oxygenator and tubing pack but are supplied together as a boxed system.

**Agreed stock levels may require a written contract – details available upon request. Guaranteed next day delivery is only available for consignments inside the UK and, providing the required product is in stock at the time of order. Order must be received before 12:00pm GMT to qualify for next day delivery.
